

Dealership Instructions for Exporting Inventory Orders from Quorum Xsellerator DMS.

After submitting daily inventory orders to General Motors the steps below must be performed daily to export inventory orders or purchase orders into **ScanApp**.

The following steps should be performed **after** the daily inventory orders have been sent to General Motors. If the following steps are performed and then after an additional order is sent, the additional orders will not be accounted for properly.

Dealerships that do not run Quorum Xsellerator can still use the power of **ScanApp** as **ScanApp** works with any DMS with a simple CSV export of the dealership Inventory Orders. Please contact your sales representative for more information.

Export Instructions

1. Log on to Quorum Xsellerator.
2. Click 'Parts' on the main menu.
3. Click 'Inventory Orders'.
4. Click 'Scanner Parts Export', the abs.csv inventory order / purchase order export file will be exported, and a dialog box will appear stating, "The open order export has been completed successfully".
5. The exported file will be located at D:\ABSPost\Dealer1\ and is named ABS.csv.
6. Right click on the file and select 'Copy'.
7. Minimize your Quorum Xsellerator application.
8. Save the file to your local desktop (or another preferred location).
9. Right click on the file and select 'Rename', renaming the file in the format MMDDYY-ABS.csv. (e.g., 103124-ABS.csv for files export on October 31st, 2024). Renaming in the format ensures an audit trail of exported data.
10. Log on to ScanApp.
11. Click 'Import' on the left hand menu.
12. Click 'New Import'.
13. Select the radio button labeled 'DMS Order'.
14. Click 'Browse' and navigate to your desktop (or other preferred location) to select the CSV file saved earlier.
15. Click 'OK'.
16. Click 'Upload'.
17. When the 'Status' for the uploaded file is 'Processed' the file has been uploaded successfully.
