

# Invoice Review with ScanApp

---

The following documentation describes the invoice function for GM Dealers using **ScanApp**. Unlike receiving within **ScanApp**, users do not have to perform any functional tasks for invoice review. General Motors invoices are automatically received within **ScanApp** and is provided for review and audit purposes.

The invoice review process within **ScanApp** is a critical component of a dealership's financial and parts management. It helps dealerships to maintain accurate records of parts received, track any discrepancies, and ensure that all transactions are accounted for and provides a streamlined way to compare invoiced items against actual parts received, helping to identify any inconsistencies such as short shipments or missing items.

## Invoice Review Instructions

1. On the **ScanApp** website click on the Invoices menu.
2. GM Invoices are shown in ascending order from the latest invoice received by **ScanApp** shown first.
3. Invoices can be sorted by date and/or by Invoice Header/Line-item status. Statuses meanings are as follows:
  - Invoice Header:
    - a) Open – The invoice has one or more lines that have not been received in **ScanApp**.
    - b) Closed – All lines on the invoice are closed and do not have any open lines for receipt.
  - Line-Items:
    - a) Open – The line items has not been received in **ScanApp**.
    - b) Closed – The line items has been received in **ScanApp**.
    - c) Manually Closed – The line items has not been received in **ScanApp** but has been manually closed. (Usually as part of the reconciliation process).
    - d) Automatically Closed – Some invoice line items such as credits or core returns do not require receiving.
    - e) Short Shipped – A flag that can be used by management to track short shipped parts for further review.

4. To view individual invoice details, click on the 'View' button. Invoice header and line-item details will be shown.
5. Notes and reminders can be added to either the invoice header level or the line-item level.
6. From the 'Invoice' menu click the Power Invoice Report button which provides details on all invoices and the related receipts. To export the data directly be sure the current data selection is 30 days or less. For periods greater than 30 days the report will be emailed directly to the logged on user due to the size of the data.
